Pollution is the introduction of contaminants into the natural environment that cause adverse change. Pollution can take the form of chemical substances or energy, such as noise, heat or light. Pollutants, the components of pollution, can be either foreign substances/energies or naturally occurring contaminants. Pollution is often classed as point source or nonpoint source pollution.

Process Compatible SO₂ Control In Cement Kilns. by David Gossman Introduction. On September 9, 2010, the US EPA finalized new emission control regulations that include new NSPS regulations on NO_x and SO₂ for all cement kilns that began construction, reconstruction or modification after June 16, 2008. Since any recently built plant will be a modern preheater/precalciner cement kiln, this ...

Environmentalists have long denounced plastic as a long-lasting pollutant that does not fully break down, in other terms, not biodegradable. In 2004, a study lead by Dr Richard Thompson at the University of Plymouth, UK, reported finding great amount of plastic particles on beaches and waters in Europe, the Americas, Australia, Africa and Antarctica.

Agricultural technology - Regional variations in technique: Dryland farming refers to production of crops without irrigation in regions where annual precipitation is less than 20 inches (500 millimetres). Where rainfall is less than 15 inches (400 millimetres) per year, winter wheat is the most favoured crop, although spring wheat is planted in some areas where severe winter killing may occur.
