On-screen Show (16:9) sets the slide dimensions to 10 in x 5.625 in. Widescreen sets it to 13.333 in x 7.5 in.. Both of these options are the same aspect ratio so they will look the same in Normal View, since PowerPoint automatically adjusts the zoom level.Widescreen (13.333 in x 7.5 in.) provides more slide surface area for the content, so that is the best choice for presentations.

Occurrence. Flicker occurs on CRTs when they are driven at a low refresh rate, allowing the brightness to drop for time intervals sufficiently long to be noticed by a human eye – see persistence of vision and flicker fusion threshold. For most devices, the screen's phosphors quickly lose their excitation between sweeps of the electron gun, and the afterglow is unable to fill such gaps – see ...
